

AgentMail Email Integration

AgentMail Setup

Configured: 2026-09-13 **Owner:** Christopher Tan

OpenClaw configuration

- AgentMail skill: installed from ClawHub (`agentmail` 1.1.1)
- OpenClaw skill entry: enabled
- Credential reference: `AGENTMAIL_API_KEY` in protected secret storage
- API host: `api.agentmail.to`
- API key is intentionally not recorded here.

Inboxes

- `mastercontrol@agentmail.to` — primary OpenClaw AgentMail inbox
- `workerb@agentmail.to` — secondary worker inbox; currently created and accessible

Python integration

- Python packages: `agentmail`, `python-dotenv`
- SDK imports verified successfully.
- AgentMail API base: `https://api.agentmail.to/v0`

Verification

- Primary inbox listing: successful (`HTTP 200`)
- Primary inbox message retrieval: successful (`HTTP 200`)

- Send/receive self-test: successful; sent and retrieved subject `OpenClaw AgentMail self-test`.
- Worker B thread listing: successful (`HTTP 200`); currently zero threads.

Operational notes

- Use the protected secret prompt for key replacement; never put API keys in chat or this page.
- AgentMail send endpoint is `/v0/inboxes/{inbox_id}/messages/send`.
- Creating additional inboxes is subject to the AgentMail plan inbox limit.
